Revert

For this tutorial step, we have prepared a repository with some ready made commits to speed things up.

You can download the repository [here](#).

We are going to undo the "append description of the pull command" commit using the "revert" command.

Go to the downloaded "stepup-tutorial/tutorial2" directory and examine the history of this repository. It should look like the following.

Examine the history log using the log command.

```
$ git log commit
0d4a808c26908cd5fe4b6294a00150342d1a58be Author:
yourname <yourname@yourmail.com> Date: Mon Jul 16
23:19:26 2012 +0900 append description of the pull
```

Git Tutorial

```
command commit

yourname <yourname@yourmail.com> Date: Mon Jul 16
23:16:14 2012 +0900 first commit
```

Open the sample.txt file and verify its content.

```
Git commands even a monkey can understand add:
Register a change in an index commit: Save the
status of an index pull: Obtain the content of the
remote repository
```

Let's undo the latest HEAD commit titled "append description of the pull command" using the revert command.

```
$ git revert HEAD [master d47bb1d] Revert "append
description of the pull command" 1 files changed, 1
insertions(+), 2 deletions(-)
```

Open sample.txt. If the above procedure has been done correctly, the last line "pull: Obtain the content of the remote repository" should no longer exist.

Git Tutorial

You can confirm the new history log using the "log" command.

```
